## Skills

Node.Js  Express  React  NextJS  JavaScript  JavaScript  MongoDB  HTML  CSS

## Experience

February 2018 - Present

**Parkridge Valley, Chattanooga** – Mental Health Technician II

- Provides care to patients in a manner that promotes safety, comfort, and the therapeutic environment.
- Assists patients with activities of daily living; attends to patient behavioral problems and provides assistance in crisis intervention, as needed.
- Charts patient observations, following prescribed procedures and standards.
- Participates in the development and implementation of patient treatment programs.
- Maintains confidentiality of patient records.
- May perform initial patient evaluations to determine treatment priorities; may take vital signs, weights, and urine, stool, and sputum specimens.
- Performs group sessions, and in-service education

## Projects

**Fenrir** – GitHub – Visit

A turn-based, survival(ish) RPG game, built from scratch, using - NextJS and MongoDB (for statistic collection). While the art assets are not created by me, the small game engine, itself, is. I built this project to show my skills with bringing an idea to life.

**Utilized - NextJS, React, MongoDB, HTML, CSS**

**Refurn** – GitHub – Visit

An imaginary business where a local user can upload furniture to sell, when they would normally throw it away. A CRUD app which authenticates users, and allows them to list their item for the owner to respond to. Currently in dev mode to showcase features. Can build in a production mode to secure routes and improve security.

**Utilized - Node.Js, Express, MongoDB, GoogleCloud Storage, React, React-Router, Passport, Bootstrap**

**IP Address Tracker** – GitHub – Visit

An IP location finder tool that searches for the source location of the specified IP address. Displays the location source of the specified IP address. Option to generate random IP Address.

**Utilized - React, TailwindCSS, Leaflet**

**Dev–Apparel** – [Github](Github) – [Visit](Visit)

An e-commerce app featuring Server Side Rendering and custom Bootstrap Styling.

**Utilized - HTML, CSS, React-Bootstrap, NextJS, React, Stripe**
